DATE OF BIRTH 25/03/1997

INTERESTS Socialising with friends, technology, cars, motocross, aviation, gym.

STUDY Second year student, studying a Bachelor in Engineering at Victoria University.

Personal Statement and Career Goal

I am particularly interested in mobile and web development as these are my biggest strengths and its what I enjoy doing the most. I also have practical experience outside of University in both these fields. I am interested in this job in order to learn new skills relevant to my degree, and to further develop the skills I already possess. I believe that this position will enable me to do this. I feel that my passion for my degree, my enthusiasm towards the IT industry, my commitment and dedication, and my ability to work and communicate effectively in a team, would make me suitable for this position.

Skills

- Practical work developing Android applications. I am currently working on a staff rostering application that's integrated with a database. My knowledge of both front and backend systems will be hugely beneficial.
- I have one year of experience tutoring first year programming papers at university. This involves breaking down complex problems into small understandable chunks, and being able to explain it to students who have minimal coding experience. I have also done paid work assisting Polytechnic students with their web assignments.
- I am a fast learner and have taught myself Web, Android development and backend databases in my spare time.
- I have modified a website that utilises HTML, CSS, Bootstrap and Javascript for my personal online profile and my own application, QuickRoster.
- I am enthusiastic for technology, and love learning new skills. I have attended 7 Summer of Tech events including two Hackathon's.
- Strong customer relations experience gained by working as a duty manager at Pizza Hut for two years.
- Good understanding of new technology and computer systems. Enjoy learning in this area by experimentation.
- Keen to undertake improvements and generate new ideas. This is shown by my creating my own rostering application and plan to deploy it onto the market place in the near future.
- Personal qualities include reliability, good problem solving skills, ability to work well with a team.

Summary

- Academically focused 2016 results: Three A-'s and a B+.
- Good communication skills developed through customer service.
- Willing to learn- excited by opportunity to learn and develop new skills.
- Broad knowledge of programming including Java, HTML, CSS, Android, GitHub, C, Python, JavaScript, SQL/ Databases, JSON, iOS.
